

AMIT TRIVEDI

Senior UI Engineer | Frontend Engineer | UI/UX Designer | AI-Assisted Development

Indore, India | +91 89648-36439 | amitt4352@gmail.com | linkedin.com/in/amit4352

Notice Period: 60 Days

PROFESSIONAL SUMMARY

Senior UI/UX Designer and Frontend Developer with 12+ years of experience turning complex requirements into pixel-perfect, responsive, and accessible web interfaces. Deep expertise in UI engineering with HTML5, CSS3/SCSS, JavaScript, and modern frameworks (Bootstrap, Tailwind, MUI, Ant Design), combined with strong product-design skills in Figma — 500+ screens and reusable design systems delivered across enterprise products. Currently building production React applications using AI-assisted development workflows (Cursor, GitHub Copilot, Claude). Experienced in leading and mentoring junior designers and developers within Agile/Scrum teams.

CORE SKILLS

Frontend Development: HTML5, CSS3, SCSS/SASS, JavaScript (ES6+), Responsive Web Design, CSS Animations, Cross-Browser Compatibility, Web Accessibility (WCAG)

UI Frameworks & Libraries: Bootstrap, Tailwind CSS, Material UI (MUI), Ant Design, Radix UI, shadcn/ui, Bulma, Foundation, Framework7

React (AI-Assisted): React.js, Redux, Component-Based Architecture, Hooks, REST API Integration

UI/UX Design: Figma (Dev Mode), Adobe XD, Photoshop, Design Systems, Design Tokens, Wireframing, Prototyping, Atomic Design

AI-Assisted Development: Cursor, GitHub Copilot, Claude, ChatGPT, Gemini, NotebookLM, Prompt Engineering

Tools & Workflow: Git, GitHub, Bitbucket, Jira, Azure, Vite, npm, pnpm, Postman, Chrome DevTools, Playwright

Practices: Agile/Scrum, Code & Design Reviews, Technical Documentation, Performance Optimization

PROFESSIONAL EXPERIENCE

Senior UI Engineer | AI-Assisted Development

Jan 2019 – Present

Empower Integrated Solutions Pvt. Ltd. — Indore, India

- Lead UI/UX design and frontend development across 4+ enterprise web products, owning the full design lifecycle from wireframes and interactive prototypes to production interfaces.
- Built and maintained a reusable Figma design system (components, design tokens, and standards) that streamlined design-to-development handoff and ensured consistency across products.
- Develop responsive, accessible (WCAG) interfaces using HTML5, CSS3/SCSS, JavaScript, and modern frameworks (Tailwind, MUI, Ant Design, Bootstrap).
- Build production React applications with a component-based architecture, accelerating delivery using AI-assisted workflows (Cursor, GitHub Copilot, Claude).
- Convert Figma designs directly into clean, maintainable code and integrate REST APIs to power dynamic, data-driven UIs.
- Mentor junior designers and developers, assign and review work, and conduct code and design reviews to maintain quality and pixel-perfect execution.
- Author technical documentation and optimize frontend performance across client platforms.

Senior Web Designer

Feb 2015 – Dec 2018

Empower Integrated Solutions Pvt. Ltd. — Indore, India

- Converted high-fidelity designs into semantic, SEO-friendly, cross-browser HTML/CSS with full responsiveness across devices.
- Developed and maintained style guides and reusable UI components for consistency across products.
- Optimized CSS architecture and frontend assets to improve page-load performance.

Web Designer

Jun 2014 – Feb 2015

Nuance Infotech — Indore, India

- Designed and developed responsive web layouts and interfaces using HTML, CSS, and JavaScript.
- Created wireframes, mockups, and visual assets and ensured cross-browser, multi-device compatibility.

Junior Web Designer

Nov 2013 – May 2014

Master Mind E-Solutions Pvt. Ltd. — Indore, India

- Built and styled responsive web pages using HTML, CSS, and basic JavaScript.
- Created wireframes and mockups and supported senior designers in delivering client projects.

KEY PROJECTS

Web-Based PDFGUI — Scientific Data Analysis Platform (React) 5 months

Role: UI/UX Designer & React Frontend Developer

- Designed the complete UI/UX in Figma (user flows, responsive layouts, reusable components, and a design system) and built it into a production React application.
- Developed core modules — Dashboard, Upload, Processing, Analysis, and Query Window — for Pair Distribution Function (PDF) analysis of X-ray diffraction data.
- Implemented interactive data-visualization charts for scientific workflows (Background Correction, Data Smoothing, $S(Q)$, $T(r)$) with live updates.
- Built search, filtering, and download functionality for managing processed datasets, and integrated REST APIs for upload, processing status, and results.
- Created reusable React components and a modular frontend architecture to improve maintainability.

Tech: React, Redux, HTML5, CSS3/SCSS, Tailwind CSS, Radix UI, Figma, REST API, Git

Selected Projects

- TTSG — Designed the UI in Figma and built the application using React and Material UI.
- Carbotanix — Designed the UI in Figma and converted it to responsive code using Bootstrap.
- Home Smartify — Converted the UI into responsive code using SCSS and Bootstrap.
- MedfliX & Gendeeep — Designed product UIs and reusable design systems in Figma.

EDUCATION

Bachelor of Computer Application (BCA)

2014

Barkatullah University, Bhopal

Higher Secondary (12th) — M.P. Board
