PROFESSIONAL SUMMARY

UI/UX Designer and Frontend Developer with 12+ years of experience turning complex requirements into pixel-perfect, responsive, and accessible web interfaces. Strong product-design skills in Figma and Adobe XD — 500+ screens and reusable design systems delivered across enterprise products — combined with hands-on frontend development in HTML5, CSS3/SCSS, JavaScript, jQuery, and modern frameworks (Bootstrap, Tailwind, MUI, Ant Design). Now lead a team of 2 UI/UX designers and 3 React developers, delivering production React applications with AI-assisted workflows (Cursor, GitHub Copilot, Claude) and directing and reviewing the team's design and frontend work within Agile/Scrum.

CORE SKILLS

Frontend Development: HTML5, CSS3, SCSS/SASS, JavaScript (ES6+), jQuery, Responsive Web Design, CSS Animations, Cross-Browser Compatibility, Web Accessibility (WCAG)

UI Frameworks & Libraries: Bootstrap, Tailwind CSS, Material UI (MUI), Ant Design, Radix UI, shadcn/ui, Bulma, Foundation, Framework7

React (AI-Assisted): React.js, Redux, Component-Based Architecture, Hooks, React Router, REST API Integration

UI/UX Design: Figma (Dev Mode), Adobe XD, Photoshop, Design Systems, Design Tokens, Wireframing, Prototyping, Atomic Design

AI-Assisted Development: Cursor, GitHub Copilot, Claude, ChatGPT, Gemini, NotebookLM, Prompt Engineering

Tools & Workflow: Git, GitHub, Bitbucket, Jira, Azure, Vite, npm, pnpm, Postman, Chrome DevTools, Playwright

Practices: Agile/Scrum, Code & Design Reviews, Technical Documentation, Performance Optimization

PROFESSIONAL EXPERIENCE

Lead UI/UX Designer & Frontend Developer

Jan 2019 – Present

Empower Integrated Solutions Pvt. Ltd. — Indore, India

- Lead a team of 2 UI/UX designers and 3 React developers, owning the full design lifecycle from wireframes and interactive prototypes to production interfaces across 4+ enterprise web products.
- Built and maintained a reusable Figma design system (50+ components, design tokens, and standards) that cut design-to-development handoff and rework by ~25-40% and ensured consistency across products.
- Develop responsive, accessible (WCAG) interfaces using HTML5, CSS3/SCSS, JavaScript, jQuery, and modern frameworks (Tailwind, MUI, Ant Design, Bootstrap).
- Deliver production React applications ~40-60% faster using AI-assisted workflows (Cursor, GitHub Copilot, Claude); direct and review the React developers' implementation.
- Convert Figma designs directly into clean, maintainable code and integrate REST APIs to power dynamic, data-driven UIs.
- Mentor designers and developers, assign and review work, and conduct code and design reviews to maintain quality and pixel-perfect execution.
- Author technical documentation and optimize frontend performance across client platforms.

Senior Web Designer

Feb 2015 – Dec 2018

Empower Integrated Solutions Pvt. Ltd. — Indore, India

- Converted high-fidelity designs into semantic, SEO-friendly, cross-browser HTML/CSS with full responsiveness across devices.
- Developed and maintained style guides and reusable UI components for consistency across products.
- Optimized CSS architecture and frontend assets, improving page-load performance by ~30-50%.

Web Designer

Jun 2014 – Feb 2015

Nuance Infotech — Indore, India

- Designed and developed responsive web layouts and interfaces using HTML, CSS, and JavaScript.
- Created wireframes, mockups, and visual assets and ensured cross-browser, multi-device compatibility.

Junior Web Designer

Nov 2013 – May 2014

Master Mind E-Solutions Pvt. Ltd. — Indore, India

- Built and styled responsive web pages using HTML, CSS, and basic JavaScript.
- Created wireframes and mockups and supported senior designers in delivering client projects.

KEY PROJECTS

Web-Based PDFGUI — Scientific Data Analysis Platform (React) 5 months

Role: UI/UX Designer & React Frontend Developer

- Designed the complete UI/UX in Figma (user flows, responsive layouts, reusable components, and a design system) and built it into a production React application.
- Developed core modules — Dashboard, Upload, Processing, Analysis, and Query Window (25+ screens) — for Pair Distribution Function (PDF) analysis of X-ray diffraction data.
- Implemented interactive data-visualization charts for scientific workflows (Background Correction, Data Smoothing, S(Q), T(r)) with live updates.
- Built search, filtering, and download functionality for managing processed datasets, and integrated REST APIs for upload, processing status, and results.
- Created reusable React components and a modular frontend architecture to improve maintainability.

Tech: React, Redux, HTML5, CSS3/SCSS, Tailwind CSS, Radix UI, Figma, REST API, Git

Selected Projects

- TTSG — Designed the UI in Figma and built the application using React and Material UI.
- Carbotanix — Designed the UI in Figma and converted it to responsive code using Bootstrap.
- MedfliX & Gendeeep — Designed product UIs and reusable design systems in Figma.

EDUCATION

Bachelor of Computer Application (BCA)

2014

Barkatullah University, Bhopal

Higher Secondary (12th) — M.P. Board
